## Let's Revive The American Dream

Wealth distribution in the  
United States in the second quarter of 2024

US-SOS.INFO

## Huge Government Scam

Since around 1970 our government has been using predatory policies and tax cuts for the rich to transfer \$50 trillion from the working class to the rich. Now half the population has 2.5% of the wealth and 10% has 66.7%. Trump's tariffs and continued tax cuts will make the situation still worse.

If everybody understood that, hundreds of millions of people would be furious.

They'd be demanding that Trump be sacked, that pre-Reagan income tax policies be reinstated, and that a progressive wealth tax be levied.

We can make it happen.

The first step is for everyone to understand what's been done to us.

Print files for this flyer and business card are provided on the US-SOS.INFO website. You can download them for free and print them out to help spread the word.

Contacting Congress is always a good idea. Suggested messages are given on the website.

After everyone's primed and ready, we'll have a nationwide march/rally/celebration with many millions of participants. That'll get the attention of the Congress and the world.
